LITHIUM-ION BATTERY AIR TRANSPORTATION RULES
PASSENGER AIRCRAFT - CHECK-IN & CARRY-ON BAGGAGE

**CHECK-IN BAGGAGE**
- You may check-in HEDBOX Li-Ion Batteries that are equal to or less than 160 Wh as long as they are installed on/in electronic device.
- The gross weight must be less than 11 lbs/5Kg.
- Spare batteries not installed on/in an electronic device are limited to carry-on max 2 (two) unit/peace per person.

**CARRY-ON BAGGAGE**
- You may carry-on unlimited HEDBOX Li-Ion Batteries that are equal to or less than 100 Wh.
- Spare batteries not installed on/in an electronic device are required to be packed in a protective pouch or bag.
- You may carry-on HEDBOX Li-Ion Batteries that are rated between 100Wh~160Wh as long as they are installed on/in electronic device.
- Spare batteries not installed on/in an electronic device are limited to carry-on max 2 (two) unit/peace per person.

Please confirm with your airline carrier to determine any local rules and policies before traveling. Equipment must be a personal electronic and/or mobile device, only spare batteries must be safely transported and individually protected to prevent short circuiting. Place the battery in the original HEDBOX packaging, plastic bag or protective pouch-packaging that completely encloses the battery. Exposed terminals must be covered with tape or a protective cover. *Passengers cannot check-in baggage, that contain any spare batteries, regardless of the battery watt-hour (Wh) rating.*
