

Dear Value Customer,

Thank you for purchasing **RP-DC100** Professional Dual Simultaneous Battery Charger & Power Supply unit. If you want to use this unit as the **POWER BANK** power supply kit, you need to use a professional Battery pack attached to the one of the **RP-DC100** slots (Photo A) and the supplied **RPC-DC4X** power cable.

RPC-DC4X Supplied Power bank Cable:

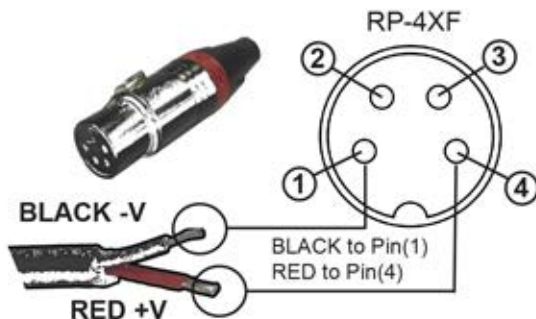

If you want to use Power Bank on any other unit that need 14.4V power supply, please use supplied **RPC-DC4X** cable with free isolate **RED** and **BLACK** copper wire.

RED = (+) 14.7V (Positive) **BACK** = (-) 14.7V (Negative)

Use a isolate two wire copper core, to solder it (mount) on inaccessible Connector that uses devices that you want to power via RP-DC100 Power Bank power option.

RP-4XF Supplied Power XLR Female connector:

If you want to power supply your Camcorder by Power Bank mod, please use supplied 4pin XLR Connector **RP-4XF**. Please use this connection diagram to solder 2 wire cable from free end side of **RPC-DC4X** Power cable to 4pin XLR **RP-4XF** Connector.

NOTE:

DO NOT SHORT CIRCUIT **BLACK** and **RED** isolate coper wire!
